

Veterinary Referral Form

The Canine Bowen Therapy

Is a gentle non-invasive, light- touch, therapy that helps promote healing, pain relief and general body rebalancing .It aims to support and boost the natural healing capabilities of the body. It is also a well-recognised therapy used with humans. We use Bowen as a complementary therapy in conjunction with and not as an alternative therapy to proper veterinary care. We ask permission from the vet who knows the dog before we commence treatment as we adhere to the Vet Surgery (Exemptions) order 1962 of the 1966 Vet Surgeons Act allowing non veterinarians to work on the animal. I am qualified to work with dogs and humans.

Please ask your vet to sign the referral form below and bring it along to the first treatment session. If your vet requires further information about the CBT please ask them to contact me on the contact details below:
